Investigation Findings: Verbal and written notifications were submitted in accordance with LAC 33:I. Chapter 39. According to Ms Kristi Trail, HSE Representative with Motive, operators discovered a leaking flange in the coker feed line. The leak resulted in approximately 2 barrels hydrocarbon condensate into the secondary containment area of the Coker Unit. The spill was cleaned by vacuum truck and contaminated soil removed for off site disposal the same day. Facility estimates indicate that no permit limits were exceeded. No know off site impact occurred as a result of this event.
