CITY, STATE, ZIP: Baton Rouge, LA 70821

\*\* (INITIAL REPORT) DETAILS  
\*\*\*\*\*

ExxonMobil had a pump that was vented to the flare last night, due to a control system command... Unknown what caused the control system to vent the pump to the flare... Nitrogen oxide was released from the flare... Delay in notification because there was some confusion on ExxonMobil's part about the RQ... There have been some recent changes on the RQ for NOx for DEQ, and ExxonMobil was unsure if LSP had followed suit...
