RE: Written Follow-Up Report as per LAC 33:I.3925 and LAC 33:V.10111.H
Sorrento Facility Upset Courtesy Notification
Motiva Enterprises LLC (Motiva) – Convent Refinery
LDEQ Agency Interest Number 2719

Gentlemen/Mesdames:

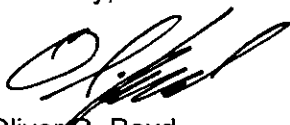

On November 13, 2013, Motiva Enterprises, LLC Convent Refinery (Motiva) reported a potential release of brine (produced) water which occurred at Motiva's Salt Dome Storage Facility in Sorrento, Louisiana. At the time of the release, brine water was being pumped from the South Pit to the North Pit when the discharge hose began spraying produced water onto the ground surface just outside of the brine pits. Upon discovery, operations personnel immediately shut down the pump which stopped the leak. Details pertaining to the notification including agencies contacted are attached.

The incident was initially reported as a potential exceedance of the 1 barrel (bbl) Reportable Quantity (RQ) for produced water. However, after further calculation, the total amount released during this incident was determined to be below the 1 bbl RQ. Therefore, Motiva is submitting this letter to clarify that the referenced incident did not result in an RQ exceedance and the verbal report made on November 13, 2013 should be considered a courtesy notification.

The incident referenced above did not represent a reportable emergency condition as defined in LAC 33:I.Chapter 39; nor was it a reportable release or incident as defined in LAC 33:V.10111.B. Also, there were no injuries, fatalities, or road closures associated with this incident.

If you need any further information or have any questions regarding this matter, please contact Anthony Schexnayder at (225) 562-6233.

Sincerely,

Oliver R. Boyd
Environmental Manager
