Single Point of Contact

Dear Sir/Madam:

On Tuesday June 4, 2013, at approximately 0930 hrs, we made notification that we exceeded a reportable quantity for sulfur dioxide and propylene due the controlled venting caused by the loss of heat medium in the debutanizer column. After further review, we have determined that no reportable quantity has been exceeded resulting from this incident. Emissions associated with this malfunction event were 290 lbs of sulfur dioxide and 83 lbs of propylene and will be captured in the Title V semiannual deviation report. Please consider this notification a courtesy.

If you have any questions pertaining to this incident or require additional information please call me at 985-764-5605.

Sincerely,

Erik R. Gadzinski
Associate Environmental Engineer
